

Nox Basic 10W Data Sheet

Nox Basic, 10W/m, 2100K / 2700K / 3000K / 4000K / 5000K / 6000K, CRI 90

*Features

- Single CCT, 2100K / 2700K / 3000K / 4000K / 6000K, high CRI 90
- 10W/m, high brightness max 950lm/m@4000K for general lighting
- Max Light efficiency 95lm/W@4000K
- Top quality and best price, low glare without light dot
- 24V, high power efficiency
- Wide beam angle 130°
- Applied in hotel, villa, restaurant, bar, shop and home
- 8mm width
- 3M adhesive back tape
- Good dissipation, 30000hrs lifespan, 50000hrs long lifespan with heatsink

Type of installation	3M adhesive tape	Location of installation	-
Connection type	Connector	Protection type	IP20

- Power off before replacement
- Do not be in violation of any fire regulations when using
- Consult qualified electricians for technical support
- If the supply cord is damaged, it shall be exclusively replaced by the manufacturer or his service agent or similar qualified person in order to avoid a hazard

*Product & Wiring Connection & Cautions

Product connections

Insert each ends of led strips into the end of the connection terminal respectively, make sure the metal clip is on the same side as the metal solder pad of led strip.

After complete the insert, also make sure both ends of led strip are tightly connected.

Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

Wiring connections

Insert one end of led strip and wire connector into both ends of the connection terminal respectively to ensure that the metal clip is on the same side as the metal solder pad of led strip.

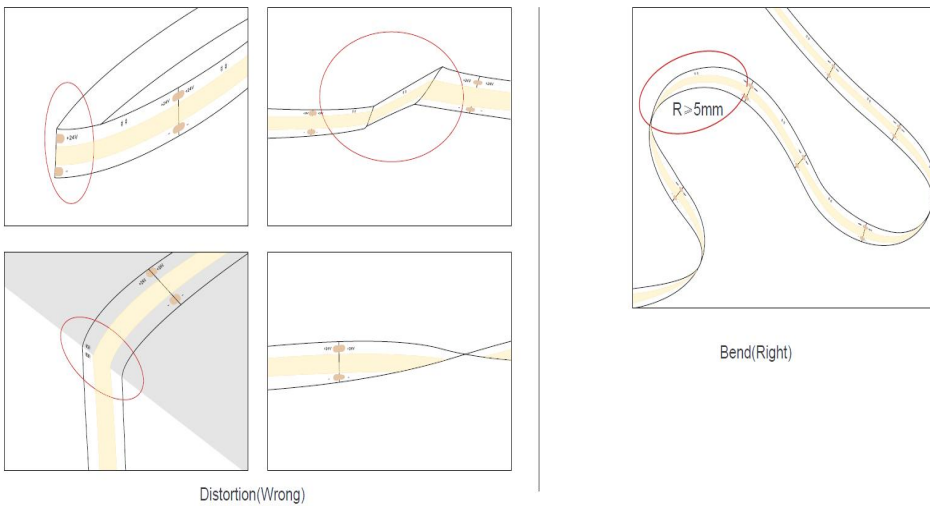

Meanwhile make sure both ends are closely connected, Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

Cautions

If the led strip needs to be torn up, please make sure that the self adhesive tape is torn with the led strip, otherwise the led strip will be damaged.

When install the led strip,please note the installation technique
The led strip can be bent, but not distorted,as shown below

LED strips are low voltage products, you must use the power supply(transformer). Please don't connect the led strip directly to the AC 110v or AC 220v, otherwise it will burn out the LED strips.

Clean up the installation surface and it will ensure the reliability of the adhesive. The electrical connection process must be operated by a professional person.
