Nox Designer 5mm 2W Data Sheet

Nox Designer 5mm, 2W/m, 1300K/1700K/2100K/2500K/3000K/4500K/8000K, High CRI

*Features

- \cdot Wide range of CCT and special colors for designers,
- 1300/1700/2100/2500/3000/4500/8000K and colors
- \cdot Mini size, 5mm width, same brightness @ 10m and 20m in length
- High lumen efficiency, 2W can be used for ambient lighting • Better solution for both decorating fixtures and ambient lighting
- fixtures \cdot Applied in Museum, Theater, Hotel, Restaurant, Shop, Bar and home
- · Can dimming by Triac / 1-10V / DALI/ WIFI
- · 24V, high power efficiency
- · Wide beam angle 130°
- · Easy to cut
- · 3M adhesive back tape

 \cdot Good dissipation, 30000hrs lifespan, 50000hrs long lifespan with heatsink

Technical data

L80/B10 service life at 25°C	30,000 hrs	L90/B10 service life at 25°C			25,000 hrs	
Warranty period	5 Years					

CIVILIGHT

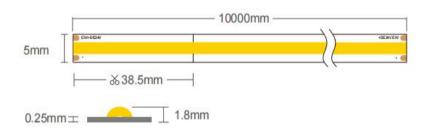

Power off before replacement

• Do not be in violation of any fire regulations when using

· Consult qualified electricians for technical support

• If the supply cord is damaged, it shall be exclusively replaced by the manufacturer or his service agent or similar qualified person in order to avoid a hazard

Dimensions

*Product & Wiring Connection & Cautions

Product connections

Insert each ends of led strips into the end of the connection terminal respectively, make sure the metal clip is on the same side as the metal solder pad of led strip.

After complete the insert, also make sure both ends of led strip are tightly connected.

Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

Wiring connections

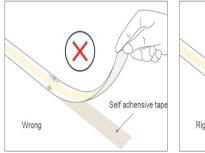

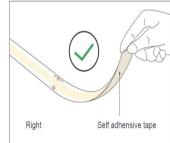

Insert one end of led strip and wire connector into both ends of the connection terminal respectively to ensure that the metal clip is on the same side as the metal solder pad of led strip.

Meanwhile make sure both ends are closely connected, Press the metal clip down with the appropriate plier to ensure that the metal clip is inserted into the appropriate position ,and connection completed.

Cautions

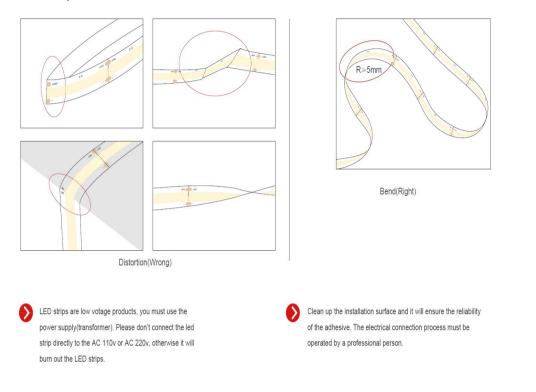

If the led strip needs to be torn up,please make sure that the self adhensive tape is torn with the led strip,otherwise the led strip will be damaged. RoHS (E

CIVILIGHT

When install the led strip,please note the installation technique The led strip can be bent, but not distorted,as shown below

Wiring Diagram

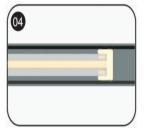

CIVILIGHT

*Installation Step

1.Clean

4.Stick the strip

2.Cut

5.Vertical Installation

3. Peal off the paper

6.Connect the power & IP65 attention

*Accessories / Parts (Optional):

*Semi-transparent

Plastic Cover

*Connector Clamp

*Aluminum slot Clamp

*Aluminum slot

*Square plastic Cover
