# CIVILIGHT Brand Solid Wood Lighting Description:

## 1. Sustainable Material Selection

CIVILIGHT's solid wood lighting fixtures are crafted from naturally renewable, organic, and eco-friendly materials. The brand sources timber exclusively from North American forests, prioritizing suppliers committed to reforestation initiatives to ensure sustainable forestry practices and prevent deforestation. Beyond wood, the fixtures incorporate minimal metal components (primarily recyclable aluminum and copper) for structural support, heat dissipation, and assembly. Plastic parts are virtually eliminated, replaced by recyclable silicone materials to enhance sustainability and natural aesthetics.

## 2. Advanced Heat Management

CIVILIGHT prioritizes minimizing heat impact on wood through high-performance LED technology. Fixtures utilize  $>150$  lm/W LEDs (CRI  $>95$ ) to achieve  $>125$  lm/W efficacy, reducing heat generation while maintaining natural color rendering. This design ensures operating temperatures below  $45^{\circ}\text{C}$  (at  $25^{\circ}\text{C}$  ambient) during prolonged use, preserving the wood's structural integrity and resistance to warping or cracking.

### 3. Optimized Lighting Design

The brand employs 3D LED modules for wide-angle illumination and All-in-One directional LEDs for focused beams, combined with anti-glare optics to guarantee UGR <17. This approach balances brightness and comfort, creating a balanced visual experience

### 4. SUNWHITE Human-Centric Lighting Technology

CIVILIGHT's proprietary SUNWHITE system replicates natural daylight variations, enabling fixtures to mimic the dynamic shifts of sunlight across seasons and times of day. This innovation allows users to experience "tree-like immersion in sunlight", fostering psychological well-being through harmonious, time-responsive illumination
